

Investor Programme

CONTENTS

1.1

THE BASIS

What makes money. Our company that makes money for you. Sales results.

1.2

THE DETAILS

Practical examples of a pension in today's financial climate. Use a conventional route. Use an alternative route. Your choice of action.

2.1

Q & A

Security of investment. Publicity. The company. ROI.

2.2

PEOPLE

"As the traditional workforce shrinks, the contingent workforce - those people working on contract, with flexible or part-time hours - grows at an ever accelerating pace."

Money is better than poverty, if only for financial reasons

Your New Pension

Thank you for downloading this Investor Programme. First of all, we are going to explain how you can secure an ever increasing pension. Then we shall introduce you to the company that provides a cash flow into your bank account every month.

There are only two ways to make money. Move a good or provide a service. Two examples are: An oil company moves a "Good" and an accountant provides a "Service". An oil company adds value to crude oil extracted from the ground by refining it and creating hundreds of different products that have many uses. An accountant? Well, using one is a necessary expense so that you don't have to learn how to become one.

We use the oil company model. In fact, our target company is a grower of consumable produce. This gives us a permanent repeat business and cash flow. What better company to invest in than a company that has a growing market, is the market leader in its field and whose sales are mainly repeat business. To give you an idea of the scale and success of this multi-national, the following graph gives you a pictorial view of sales since its formation in 1978.

Sales have now reached more than \$2 Billion. All sales flow back to investors at the top marginal rate of 68% of retail because there are no middlemen. We deal direct.

It is better to have a permanent income than to be fascinating

The details

You can find examples on the web of investing £100,000 in an annuity to produce £5,400 per year income. Looking at our financial model, investing £200 in our target company now is likely to produce an income of £5,400 per month within five years. More importantly, you start to get paid on the 15th of the month following your investment. In other words, straight away. Not £5,400 but a small amount that simply grows to this level and beyond.

How does it work in practice?

At the bottom of this page is a link to another PDF file. This is an application form that you send to the company and make an investment of £195.50. You will be surprised to learn that your money is not simply a financial investment that gives you a piece of paper saying that you have invested this sum and expect a return. No.. You get a whole box of products for your money and it places you in the computer ready for a business that grows steadily under you. And there is more. **Not only do you get a monthly return, you have the possibility of qualifying for a car, paid for by the company, free holidays with spending money and many other free events and activities simply by being an investor.** Sound to good to be true? If a situation sounds too good to be true, it usually is. In this case however, it simply works if you follow a few elementary rules. You have two choices. Your first choice is to do nothing more than invest £199.75 and watch a business grow under you

until such time as you are ready to devote a few hours to propel it forward. Your second choice is to become actively engaged in promoting your investment from the start (Recommended) so that your income develops multiple streams. OK. Let us look at the options in more detail.

Do Nothing. Invest your £195.50 and this registers you with the company. It secures your position at the top of your own income stream for ever. In your box of products that is delivered to you, there is another investor application form. Sign it at the bottom and send it to me at the Investor Relations address on page four. When we receive it, the next person who invests in the company through this website will be sponsored by you and as far as the company's computer is concerned, that individual will always be in your business and whatever he or she does will be reflected in your monthly return. You could leave it at that if you wanted to because this new individual will do the same as you and another person will be installed into your business in the same way and so on ad infinitum. You could wait to see your business grow and engage in it at a time when you are ready.

Do slightly more than nothing. A variation on doing nothing is doing slightly more than nothing. It is to continue to invest in your income stream every month at a minimum rate of £399.50. Your investment is covered by products delivered to you. If you do this, you will continue to receive a bonus paid directly into your bank account every month that soon exceeds the rate at which you are investing. Compare this with investing in a pension fund at the same rate. Let me assume that you are 35 years of age. If you invest £200 to start and then £4,800 per annum in a good pension scheme that averages an 8% return over 25 years, you will end up with a tax free sum of £380,351 to invest in an annuity. In order to put this into perspective, we look at the annuity rates today and adjust for inflation. Let's be generous and assume that the inflation rate is only 3.1% over this period. At today's money, the fund is now only

worth £177,304. Invest that in an annuity at 5.4% and it will generate an annual income of just £9,574 or £6,382 after tax and insurance which now translates to £531 per month. Hmm. After 25 years! You have made an investment in actual cash amounting to £120,200 and you get £531 per month in return? Is this a good deal or not? Not... Methinks.

So! Doing slightly more than nothing will give you an increasing monthly income that knocks spots off the conventional wisdom. Who is paying for the pension industry personnel with their massive head office buildings, expense accounts, nice cars and big houses? If you go down the conventional route of pension provision, YOU ARE. Much better then, to invest in your own business.

Become actively engaged. This is the best option if you want a very quick return on your money. Simply introduce more people to this website. If they decide to follow your example, they will become part of your business and you and they will benefit more. Why? Because they will do what you do. They will find more people. Just imagine your business growing at five times the speed of the person who is doing nothing. Imagine what your income will be in 12 months from now. Not £1,000 per month but £5,000 per month. Why? Because the rule of thumb in this business is that for every investor that you personally introduce, it translates to £1,000 per month income for you. And if they do the same, for them too. It is in your financial interest to encourage them down this path. Don't forget, for every person that you introduce, the website builds a business beneath them. Ad infinitum. It never stops. So, this is why it is best to start today, without delay, so that the website can do the work for you.

The sooner you are registered, the sooner it will be that you start reaping the rewards. And these rewards are not just financial. There is a strong social side to this activity too.

Click on the link below to get going. You can fax the form to the company direct or you can send it to us here at

Investor Relations. The advantage of sending it to us here is that we get to know about you sooner and so we can set up the system of the website promoting you a lot quicker. But you decide. You can fax the company direct if you wish. We shall still need the blank Investor form signed by you to put on the website. You will then be the next person to have another investor enter under you.

Investor Form

OK. [Here is the link to the Investor Form](#). Download it, authorise yourself to become part of the company. Post it or fax it to the company and send me a copy so that I can look out for you as soon as your form has been processed or send it me direct.

You will receive a box of subsidised products and included is another form which you sign at the bottom and send to me so that the next person who becomes an investor is placed in your income stream. Anything that they do is reflected in your monthly bonus and so on ad infinitum.

Talking of Latin phrases:

Carpe Diem!

[Do it NOW!](#)

If you cannot read the figure of €604,669, this is an actual annual profit share cheque given to a British couple who have invested their money and time in this enterprise. A profit share cheque is given in addition to their monthly return. So, if proof were ever needed...

Q&A

Money is like manure; it's not worth a thing unless it's spread around encouraging young things to grow.

How do I know that my investment is secure and that I shall be paid every month?

This company has never missed a bonus run in all the years that it has been trading. It is a cardinal rule that investors are paid first on the 15th of each month. The foundation of the company is the outstanding product range and the more than \$1Billion worth of capital assets that underpin the operation. FLP is totally debt free and is not subject to shareholder influence because it is privately owned and operated. 5 Million investors cannot all be wrong..

Why haven't I heard of this company before? Does it advertise? Are the products sold in shops?

You will not have heard of Forever Living Products unless you have been personally introduced to their products by someone. FLP does not advertise. The most powerful method of getting any message across and the most enduring, is by word of mouth. The products work so people become enthusiastic about them and tell other people. It is that simple. The FLP product range is not sold in shops although they may be found at clinics, surgery's and places where a certain knowledge of the products benefits are known and understood; in veterinary practices for example.

Can I sell these products to anyone? How do I learn what they do? Are they safe?

Yes. Once you become an investor, you also become an authorised distributor so you could sell all the products in your initial box. A retail price list is included. Don't forget that you bought them at the wholesale price so you will make a profit. In the box are comprehensive guides and the reasons behind creating the products. There are regional centers around the UK where product training is given. Yes. All the products are safe because they are thoroughly tested, not on animals however. Our products are FDA approved, Kosher rated and additionally carry the Islamic Seal of Approval.

I am not a salesman or saleswomen. I don't want to sell these products to my friends and family...

Good! OK. No problem. Give away your surplus products to people who need them. In a short period, you will be being paid more than the cost of the products so, it won't matter what you do with them. Better though, to help somebody who could use the benefits to improve their quality of life.

How long will it take to get my investment back?

That depends entirely upon two factors. The first factor is the number of people visiting the site and investing and the second factor is dependent upon your own activity. You may appreciate by now that there is no selling involved. You simply refer people to the website and let them make up their own mind.

Can I personalise the website so that people visiting it are automatically referred back to me?

What you can do is replicate what we have done here. A WordPress Blog is free to download. Self replicating websites do not work very well. It is better to stamp your own individuality on a website and in this way, become the 'Authority'. We help you do this and you can also use our shopping cart as an affiliate so that you have an electronic outlet for your products.

Can I register as a company, corporation or under my professional name?

As an investor, you register as an individual although you can register your spouse or partner as well on the same application form. The advantages of this are that you will both be invited to events that you chose to attend.

I know people in other parts of the world who might want to look at this. Are they able to participate?

Yes. This programme is open to all, wherever they are in the world. Simply [download this form](#) and return it to the Investor Relations address on page 4

Prudence, dear Prudence **Protect yourself, even from govern- ments...**

Frankly, there is no safe haven for your money. All investments carry risk. The smart move is to minimise risk and extract the best and safest return that you can. Here is an actual, verifiable example. So called "Gilt" issued by the government are not even that safe. If you had invested in 4.5% British government stocks 50 years ago, you could only sell at four-fifths of what you paid for them and taking into account inflation, you are showing a loss of 95%!

Currently, governments across Europe are borrowing heavily and that will put a strain on interest rates and inflation in the longer term. Even shares have lost their easy habit of growing. In fact, in this century, they have tended to shrink.

Time for a better plan.

Inflation proof

The beauty of investing in a company that is expanding, has a consumable product and which sells direct, is that the retail price always keeps up with inflation. As the retail price continues to track current prices, so your ROI maintains its performance because your monthly bonus is directly related to the retail price of the volume in your business.

Time to take action

Look what else is on offer

Not only do you get a growing monthly return on the 15th of the month following your investment, you are also eligible for an earned incentive bonus of between £263 and £525 per month and a spectacular profit sharing programme that pays individuals between £2,000 and £180,000 every March. So, why would you want to invest the same amount in a conven-

tional pension plan that has a meagre return? It doesn't make sense does it?

Time to take action

How can I be sure?

There are no certainties in life except one. Recent shocking events have proved that death can be a matter of chance. So, let us assume the worst. You die before your time, to use a hackneyed phrase. What happens to your investment now? Unbelievably, it is willable! Yes. You can pass it on to your dependents. Let us assume that your monthly bonus is now exceeding £2,500 per month for a £399.50 per month investment. If your dependents continue to invest, they will receive your bonus plus any other incentives due. Compare that with any other investment on earth!

Time to take action

You have nothing to lose

Imagine! A £200 investment now guarantees an income for life for you and your dependents and their dependents and their dependents and so on. And it just keeps growing. You cannot even stop it growing! Once you invest, you just cannot stop your investment growing. It's amazing. And all because you wanted to do the best for yourself and your family in these uncertain times. You will have put in place an unstoppable income stream that will transform your family's fortunes whether you be a Lord or Lady, Chartered Accountant, Lawyer, Teacher, Singer, Artist, Property Speculator, Futures Dealer, Jockey, Trainer, Actor, Broadcaster or just plain Savvy. This is unique. It is not available elsewhere. You will belong to an exclusive financial club where there is no fee to join. ALL investment is covered by product which is delivered to you or which can be collected locally and which has a cast iron money back guarantee!

Time to take action

WHAT OTHERS ARE SAYING

"The company is exceptional. It allows anyone to make money at any level."

"Imagine being able to generate incomes of around £20,000 per month. Well, we do and more."

"I was a Management Accountant prior to joining. All bonuses are paid on the retail price and our incomes are generated quickly."

**"WE DIDN'T JOIN TO
BECOME RICH. WE
JOINED BECAUSE WE
WANTED A MUCH
RICHER QUALITY OF
LIFE"**

AND MORE...

"We now have a six figure income. We have a luxury motor home paid for by the Earned Incentive Bonus and we receive a profit share cheque every year"

"We are now financially secure and work to help others achieve the same security"
